EMPLOYEE MANAGEMENT SYSTEM

SPRING BOOT/VUE.JS

Bacho Khatchvani

Introduction:

- Purpose:
  - The employee management system is a Web-application built using Spring Boot. It will provide a user-friendly interface for managing employee-related data.

- Target Users:
  - This project is primarily for organisations, including small businesses, startups. It helps HR departments, managers, and employees who need efficient tools for handling employee-related processes.

Application features:

- List Employee
- Pagination
- Add Employee
- Update Employee
- Delete Employee
- Login/Logout
- Registration
- Role Management
